

SHARI GOLD

PERMANENT MAKEUP AFTERCARE GUIDLINES

PLEASE FOLLOW THESE INSTRUCTIONS CAREFULLY

- Start using your Aftercare Balm with or without Lidocaine and keep the area moist for a full 7 days. Use a Q-tip and lightly massage a light coat over the area several times a day. Keeping the pigmented skin moist is very important to control the amount of drying and crusting allowing for optimal colour retention. (10 times a day is not too much 3 times a day is too little)
- 2nd week use balm morning and night only
- Wash lightly with Trisan Antibacterial Skin Cleanser. Air dry or use paper towel to dry pigmented area. (daily)

AVOID

- Any makeup for 5 to 7 days.
- Any type of skin peels or products containing Retin A, glycolic and makeup over pigmented area.
- Hot steamy showers or long baths. Keep your face away from showerhead and apply coating of Aftercare Balm while bathing or showering.
- No swimming, saunas or Jacuzzi for a period of 5 to 7 days.

DO NOT

- Pick peel or scratch as this could cause scarring or removal of colour.
- Do not touch the area except for cleansing with Trisan Antibacterial Skin Cleanser and applying Aftercare Balm.

NOTE

- Colour will appear sharp and dark following the procedure. As the pigment is saturated beneath the skin the colour will lighten considerably.
- The final colour should not be considered for approximately 6 to 8 weeks after the final visit.
- The sun can cause fading therefore it is recommended to always keep a light coat of sun block on pigmented skin. Please schedule any touchup 6 weeks post application and 1 year to refresh.
